Education

Sal College of Engineering

Bachelor of Technology in Information Technology (CGPA of 7.60/10)

August 2021 – June 2024

Gujarat, India

Khyati School of Engineering

Diploma of Technology in Information Technology (CGPA of 8.63/10)

August 2018 – June 2021

Gujarat, India

Experience

Technostark Solutions

Dec 2023 – May 2024

Frontend Development Engineer , Intern

Gujarat, India

- Implemented and maintained UI components in **AngularJS** and **Tailwind CSS** for an admin panel, seamlessly integrating backend functionalities powered by **MySQL**.
- Translated **Figma designs** into functional user interface elements, ensuring responsiveness, code efficiency, and reusability.
- Utilized **Git** for version control, managing code repositories and following an **Agile** software development environment for efficient collaboration and delivery.

Stypix Solutions

Jun 2023 - Sep 2023

Frontend Development Engineer , Intern

Gujarat, India

- Developed a car rental project using **React.js** and **Tailwind CSS** to create user-friendly web solutions, focusing on responsive design and seamless user experience.
- Collaborated with my team using **Git**, ensuring version control, smooth code integration, and effective teamwork throughout the project.
- Enhanced communication and professionalism in a remote setting, demonstrating the ability to explain technical concepts clearly and contribute effectively to project tasks.

Projects

Sales Forecasting | *PowerBi, Dax Query*

- Executed comprehensive **Data cleaning** to ensure the integrity, accuracy, and consistency of sales data, preparing it for detailed analysis and reliable decision-making.
- Developed and implemented sales forecasts for the next 15 days using **DAX queries**, providing actionable insights that support informed decision-making and strategic planning for business growth.

E-Commerce Website Data Extraction and Analysis | *Python, Selenium*

- Utilized **Python**, **Selenium**, and **BeautifulSoup** to implement web scraping and automate data collection from multiple sources, ensuring timely and accurate retrieval of relevant data.
- Performed **Data cleaning** on the collected data using **NumPy** and **Pandas** to eliminate inconsistencies and enhance data quality, making it suitable for further analysis.

Data Analysis of Delivery Efficiency and Sales Metrics | *SQL*

- Executed Data cleaning techniques using **SQL** to ensure data accuracy and integrity, followed by in-depth analysis of delivery efficiency and sales metrics to derive actionable insights for optimizing business operations.

Certifications

- Web Design:** from Figma to Webflow

Volunteer Activity

- Led a team to successfully organize and manage the annual college fest, overseeing event planning, coordination, and execution while ensuring seamless collaboration and timely delivery of tasks.

Technical Skills

Analytical Tools: Power BI, Tableau, Microsoft Excel

Languages: SQL, Python, Html, Css, Js

Technologies/Frameworks: Github, Selenium, NumPy, Pandas
